Portfolio

Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Accomplished Full Stack Developer with 2+ years of hands-on production experience specializing in architecting, developing, and deploying enterprise-grade web applications, multi-tenant SaaS platforms, and sophisticated CRM systems. Demonstrates expertise across the complete technology stack including modern JavaScript frameworks (MERN, Next.js, React), cloud infrastructure (AWS), and contemporary DevOps methodologies. Proven track record of optimizing application performance, implementing scalable distributed architectures, and delivering transformative solutions across various industry verticals including finance, real estate, human resources, and e-commerce. Strong foundation in algorithmic problem-solving with 500+ data structure challenges completed, complemented by practical experience in system engineering for AI integration and building resilient microservices ecosystems. Committed to writing maintainable, documented code following industry best practices and agile development principles.

CORE TECHNICAL COMPETENCIES

Frontend Development:

React.js, Next.js (App Router, Pages Router, Server-Side Rendering, Static Site Generation, Incremental Static Regeneration), HTML5, CSS3, Tailwind CSS, Ant Design, Flowbite, Material-UI, Responsive Web Design, Progressive Web Applications, Search Engine Optimization, Mobile-First Development, Cross-Browser Compatibility, Accessibility Standards (WCAG)

Backend Development:

Node.js, Express.js, RESTful API Architecture, JWT-based Authentication, OAuth 2.0 Authorization, Microservices Architecture, Distributed Systems Design, API Gateway Implementation, Custom Middleware Development, Server-Side Rendering, Serverless Computing, Event-Driven Architecture, Message Queuing Systems

Database & Data Management:

MongoDB, Mongoose Object Document Mapper, Firebase Realtime Database, Redis In-Memory Data Store, PostgreSQL, NoSQL Database Design, Relational Schema Architecture, Query Performance Optimization, Indexing Strategies, Database Sharding, Replication Configuration, Data Migration Planning, Backup & Disaster Recovery

Cloud Infrastructure & DevOps:

Amazon Web Services (EC2 Compute, S3 Object Storage, Lambda Serverless, CloudWatch Monitoring, API Gateway, Amplify Hosting, CloudFront CDN, IAM Security, Route 53 DNS), Docker Containerization, Continuous Integration/Continuous Deployment Pipelines, GitHub Actions Automation, Git Version Control, Vercel Edge Deployment

API Development & Documentation:

Postman API Testing, Swagger/OpenAPI Specification, Comprehensive API Documentation, RESTful Best Practices, Versioning Strategies, Rate Limiting Implementation, API Security Protocols

Software Engineering Practices:

Data Structures & Algorithms, Software Design Patterns (Singleton, Factory, Observer, MVC), System Architecture Design, Object-Oriented Programming Principles, Agile/Scrum Methodologies, Test-Driven Development, Clean Code Principles, SOLID Principles, Code Review Processes, Security Best Practices, Performance Optimization Techniques, Debugging & Profiling, Technical Documentation

Project Management & Client Relations:

Client Management & Stakeholder Engagement, Requirements Gathering & Analysis, Business Requirements Documentation, User Story Creation, Sprint Planning & Estimation, Cross-Functional Team Collaboration, Technical Consultation, Client Communication Presentations, Scope Management, Expectation Management, Feedback Integration

Programming Languages & Technologies:

JavaScript (Advanced), TypeScript (Strongly Typed), Python (Scripting & Automation)

Third-Party Integration & APIs:

Payment Gateway Integration (Stripe, Razorpay), Transactional Email Services (SendGrid, AWS SES), Cloud Storage Solutions, CRM System Integration (Tally), Geolocation & Mapping Services, Social Media Authentication, SMS Gateway Services, Analytics Integration

PROFESSIONAL EXPERIENCE

Full Stack Developer

Dec 2024

Ameya Innovex

H

- Spearheading the architecture, development, and deployment of multiple enterprise-grade SaaS products serving 100 organizational users across finance, human resources, operations, and client relationship management domains
- **Cashwise (Comprehensive Expense Management Solution):** Engineered a full-featured financial tracking system featuring account-wise expense categorization, digital voucher workflow automation, and seamless Tally ERP bidirectional integration enabling real-time financial data synchronization, automated reconciliation, and compliance reporting. Reduced manual accounting tasks by 60% and improved financial visibility through customizable dashboards
- **OfficePulse (Integrated Operations Platform):** Architected and deployed an end-to-end business operations suite encompassing lead acquisition and nurturing workflows, intelligent customer query routing and resolution, automated invoicing processes, and comprehensive payment tracking functionality. Successfully streamlined office operations
